

User Research Observation Framework

1. Activities

- What happens?
- What are the people doing?
- What is their task?
- What activities do they carry out?
- What happens before and after?

2. Environment

- What does the environment look like?
- What is the nature and function of the space?

3. Interaction

- How do the systems interact with one another?
- Are there any interfaces?
- How do the users interact among one another?
- What constitutes the operation?

4. Objects

- What objects and devices are used?
- Who uses the objects and in which environment?

5. User

- Who are the users?
- What role do the users play?
- Who influences them?
